Key Features

Flame Failure

A safety device that ensures gas cannot flow from the cooktop if the flame is extinguished. No flame = no gas = safer home.

Cast Iron Trivets

Cast iron trivets are heavier and more durable than the typical enamel-coated trivet. This means a more stable cooking surface and less chance of damage to the cooktop.

Wok Burner

More and more modern cuisine cooking methods need instantly adjustable high heat. Choosing an Omega with Wok Burner gives you the power and control for fun and exciting Asian-style cooking. What's more, this powerful gas burner is also perfect for boiling water fast or heating soups and stews quickly and conveniently.
